

Odoo 19 User Manual

Baraka Mini Mart — Community Edition

This manual walks through Baraka Mini Mart's day-to-day tasks exactly as they appear in the live system. Every screenshot below was taken from the actual configured Odoo 19 Community Edition instance — nothing here is a mock-up, and nothing has been customized with Odoo Studio (which isn't available in Community). What's shown is what's on the screen.

Quick Reference — Who Needs What

Role	Sections to Know
Manager	All sections — plus final sign-off on purchases, bills, and credit
Cashier	Getting Started, Sales (Point of Sale)
Storekeeper	Getting Started, Inventory, Procurement (receiving goods)
Shop Attendant	Getting Started, Inventory (stock levels & shelf restocking)

Getting Started — Logging In

Step 1. Open the Odoo web address and enter your email and password, then click Log In. Each person logs in with their own account — this is what lets the system show which employee handled each sale.

The login screen

1. Sales — Walk-in & Phone/WhatsApp Orders

Every sale goes through the same Point of Sale register, whether the customer is standing at the counter or phoned/WhatsApped their order in. The only difference is who picks the products:

For a walk-in customer, the customer selects items themselves and brings them to the counter. For a phone or WhatsApp order, the Cashier receives the order and adds the same items on the register screen while physically packing them for pickup — the steps from there are identical.

Step 1. Tap each product to add it to the order. The cart on the left shows every item, its quantity, and its Lot Number where the product is tracked (used for stock and expiry tracking). Once everything is added, tap Payment.

Adding products to an order at the register

Step 2. Choose how the customer is paying: Cash, Mobile Payment (M-Pesa), or Customer Account. Customer Account records the sale as credit against a specific customer — tap Customer first to link the sale to their record before choosing this option.

Choosing a payment method

Step 3. The amount is filled in automatically. Tap Validate to complete the payment.

Confirming a Mobile Payment

Step 4. The sale is complete. Receipts are only printed or emailed if the customer asks for one — tap Print Full Receipt, or type an email address, only when requested. Otherwise tap New Order to move straight to the next customer.

Payment successful — receipt on request

2. Procurement — Ordering from Suppliers

Purchases are raised directly in the system rather than tracked only by phone or WhatsApp. The Manager creates the order, the Storekeeper confirms what physically arrives, and the bill is entered once the supplier's invoice is in hand.

Step 1. Create a new order: choose the Vendor, add the product(s) and quantity needed, then either Send RFQ (to request pricing first) or Confirm Order to raise it directly.

The screenshot shows the 'New Request for Quotation' form in Odoo. The form is titled 'Request for Quotation' and 'New'. It includes fields for 'Vendor' (Broadways Bakery), 'Vendor Reference', 'Currency' (KES), 'Order Deadline' (Aug 15, 10:38 AM), 'Expected Arrival' (Aug 16, 10:38 AM), and 'Deliver To' (Baraka Mini Mart: Receipts). There is a checkbox for 'Ask confirmation' and a note '100% On-Time Delivery'. The 'Products' tab is active, showing a table with one product: 'Bread 400g' with a quantity of 12.00, unit price of 49.00, and amount of 588.00 KSh. The 'Untaxed Amount' is 588.00 KSh. Buttons at the top include 'Send RFQ', 'Confirm Order', 'Print', and 'Cancel'. The top navigation bar shows 'Purchase', 'Orders', 'Products', 'Reporting', and 'Configuration'.

Creating a Request for Quotation

Step 2. Once confirmed, it becomes a Purchase Order. From here you can Receive the goods, Upload the vendor's Bill, Send the PO, or Print it.

The screenshot shows the 'Purchase Order P00031' form in Odoo. The form is titled 'Purchase Order' and 'P00031'. It includes fields for 'Vendor' (Broadways Bakery), 'Vendor Reference', 'Currency' (KES), 'Confirmation Date' (Aug 15, 10:39 AM), 'Expected Arrival' (Aug 16, 10:38 AM), and 'Deliver To' (Baraka Mini Mart: Receipts). There is a checkbox for 'Ask confirmation'. The 'Products' tab is active, showing a table with one product: 'Bread 400g' with a quantity of 12.00, unit price of 49.00, and amount of 588.00 KSh. The 'Untaxed Amount' is 588.00 KSh. Buttons at the top include 'Receive', 'Upload Bill', 'Send PO', 'Print', and 'Cancel'. The top navigation bar shows 'Purchase', 'Orders', 'Products', 'Reporting', and 'Configuration'.

A confirmed Purchase Order

Step 3. When the goods physically arrive, open the receipt and tap Validate to confirm the quantity received matches what was ordered. This is what updates stock on hand.

Products with current stock on hand

Step 2. Opening a product's Inventory tab shows its expiry tracking — for perishables like bread, milk, and eggs, an alert is set to trigger a set number of days before the expiration date, so items can be pulled or discounted in time.

Step 3. The Replenishment screen lists every product against its Min and Max stock levels. Once stock drops below the minimum, an Order button appears — tap it to raise a purchase, or use Automate to let it happen without a manual step. Snooze puts it off if it's not needed yet.

Product	On Hand	Forecast	Min	Max	To Order	Action

Reviewing what needs reordering

4. Credit Management — Customer Accounts

Every credit sale (paid via Customer Account at the till) is tracked against the specific customer it was sold to, replacing the credit notebook.

Step 1. Accounting → Customers, filtered to Customer Invoices, lists everyone currently carrying a balance with Baraka.

The screenshot shows the Odoo Customers page. The header includes navigation tabs: Accounting, Dashboard, Customers, Vendors, Accounting, Review, Follow-Ups, Reporting, and Configuration. The breadcrumb trail is Customers. A search bar is present with the text 'Customer Invoices'. The table below lists customers with open balances.

Follow-up Responsible	Name	Email	Phone	Activities	Country
☐ F	Felix Muchina		+254 716 945345		
☐ S	Samuel Mwangi		+254 781 956658		

Customers with an open balance

Step 2. Opening a customer shows their order history — what they bought, when, and whether it's been posted to their account.

The screenshot shows the Odoo Orders page for a specific customer. The breadcrumb trail is Customers / Felix Muchina Orders. A search bar is present. The table below lists the customer's order history.

Order Ref	Session	Date	Point of Sale	Receipt Number	Customer	Employee	Total	Status	Invoice Stat...
☐ Baraka Mini Mart - 000014	Baraka Mini Mart/00008	Aug 15, 10:47 AM	Baraka Mini Mart	261-1-000014	Felix Muchi...	Administrator	480.00 KSh	Posted	

A customer's order history

Step 3. Their own record has one-click stat buttons across the top — Sales, PoS Orders, Invoiced, and Purchases — for a quick view of what they've bought and what's outstanding.

A customer's record

5. Reports

Point of Sale → Reporting → Orders Analysis breaks sales down by category, switchable to other measures from the Measures dropdown. The same Reporting menu pattern exists inside Inventory, Purchase, and Accounting for stock, supplier spend, and financial reports.

Step 1. A category breakdown of sales, viewed as a pie chart.

Orders Analysis — sales by category

A Note on the System

Baraka Mini Mart runs Odoo 19 Community Edition. Every screen in this manual is the standard Odoo interface — there is no Odoo Studio customization involved, so what's shown here is exactly what appears on any device, for any user with the right access.

Prepared per Phase 6 (Adoption — Training & Documentation) of the ERP Implementation Back-Office Workflow.
